This warranty shall survive the expiration or termination of this Contract. In addition, the defense of *force majeure* shall not apply to the Contractor's failure to perform specification requirements as a result of any date-related data Year 2000 issues.

2. Additionally, notwithstanding any other warranty or disclaimer of warranty in this Contract, the Contractor warrants that each hardware, software, and firmware product delivered under this Contract shall be able to accurately process date/time data (including but not limited to calculation, comparing, and sequencing) from, into, and between the twentieth and twenty-first centuries, and the years 1999 and 2000 and leap year calculations, to the extent that other information technology utilized by the State in combination with the information technology being acquired under this Contract properly exchanges date-time data with it. If this Contract requires that the information technology products being acquired perform as a system, or that the information technology products being acquired perform as a system in combination with other State information technology, then this warranty shall apply to the acquired products as a system. The remedies available to the State for breach of this warranty shall include, but shall not be limited to, repair and replacement of the information technology products delivered under this Contract. State Procurement Office

Capital Center Suite 103

15 South 15th Ave

Phoenix, AZ 85007-3223

Any contract entered into as a result of this solicitation is for the convenience of the State and as such, may be terminated without default by the State by providing a written thirty (30) day notice of termination.

Usage Report

The contractor shall furnish the state a usage report delineating the acquisition activity governed by the contract. The format of the report shall be approved by the state and shall disclose the quantity and the dollar value of each contract item by individual purchasing unit.

An annual usage report shall be due no later than January 15 for the previous year, or upon request by the State Procurement Office.

Term of Contract (2 Year)

The term of the resultant contract shall commence upon award or as specified in the award documents and shall remain in effect for two (2) years unless terminated, canceled, or extended as otherwise provided herein.

Contract Extension (Months)

By mutual written contract amendment, any resultant contract may be extended for supplemental periods of up to a maximum of 36 months.

Price Adjustment (After 180 Days)

The Procurement Office may review a fully documented request for a price increase only after the contract has been in effect for 180 days. The requested increase shall be based upon a cost increase to the contractor that was clearly unpredictable at the time of the offer and is directly correlated to the price of the product concerned. The State Procurement Office shall determine whether the requested price increase or an alternate option, is in the best interest of the State.

The contractor shall offer the State a price reduction on the contract product(s) concurrent with a published price reduction made to other customers.

Written notification by the contractor is required thirty (30) days in advance of any price change. All price adjustments will be effective on the first day of the month following approval by State Purchasing.

Pricing, Zone (3 Zones)

Due to Factors such as delivery locations, pricing advantage, compatibility, etc., the State has been divided in three (3) zones. Therefore, the listed line items have been repeated three (3) times to designate the zones.

The following will define each zone:

Zone 1 Mohave, Yavapai, Coconino, Navajo and Apache Counties

Zone 2 La Paz, Yuma, Maricopa, Pinal and Gila Counties

Zone 3 Pima, Santa Cruz, Graham, Greenlee and Cochise Counties

Note:

To be considered for award, the bidder is required to provide prices on "all" items within each zone and must submit a subtotal price for each zone. Failure to provide pricing for any item within the zone, or failure to provide subtotals will result in the bidder being declared nonresponsive for that zone and ineligible to receive an award. Awards shall be based on aggregate totals per zone.

Exception:

It is understood that bidders may not be able to bid on all line items in the re-refined and synthetic areas, therefore awards may be made by line item, groups or aggregate whichever is most advantageous to the State.

Estimated Quantities (Considerable)

The state anticipates considerable activity resulting from contracts that will be awarded as a result of this solicitation; however, no commitment of any kind is made concerning quantities actually acquired and that fact should be taken into consideration by each potential contractor.
